	<p>Date: 11/8/2007</p> <p>Q1 - Other NASA Centers have a required format for the Past Performance Information form. Does Stennis have a required format? A1 - There is no required form or format for the required past performance information, but submission must comply with "Instructions Regarding Submission of Offer" on pages 3-4 of subject RFP.</p> <p>Q2 - Does the Delivery Date mean the date that the unit(s) are signed for at SSC, or the date that unit(s) are accepted by NASA after post delivery inspection? A2 - The "Delivery Date" requested in the "Instructions Regarding Submission of Offer," on pages 3-4 of subject RFP, is intended to mean the date units would be delivered to SSC and does not include SSC inspection or acceptance.</p> <p>Q3 - The Quality Control Manual is required both for the proposal and in the Specification, 1.3 SUBMITTALS, SD-08. Is this the same QC Manual, and if so, are both requirements to be met? A3 - These do refer to the same manual. If there are no changes in the manual from the date of proposal submission to the required contract submission date, no additional submission will be required.</p> <p>Q4 - In the Specification, 1.9 GUARANTEE, the vendor is asked to guarantee the design. The Vendor can't guarantee the design or the functionality of the design that is furnished by a third party. Please clarify what is meant by guarantee of design. A4 - This is an error in the specification. As this is a customer provided design, the contractor will not be required to guarantee the design.</p> <p>Q5 - How many CSG units are being purchased? The solicitation, block 20, says 3 units, with delivery of first unit at 13 weeks, and 2nd and 3rd units at 16 weeks. The Specification in Part 1, paragraph 1.1 SUMMARY says six. Please clarify. 	<p>this solicitation is issued as a Multiple Award, Indefinite Delivery Indefinite Quantity (IDIQ), Best Value RFP. It is anticipated that multiple (at least two) awards will be made as a result of this solicitation. Therefore, the quantity of six (6) referenced in the specification reflects two contract awards. As indicated in the synopsis, on page 1 of the SF1449, and in the ordering clauses of the RFP, the minimum order amount anticipated on any single contract is 3 and the maximum is 33. The overall maximum number of units that will be ordered on any combination of contracts is 33.</p> <p>Q6 - Is an IGES or other CAD model going to be made available as a supplement to the provided drawings? A6 - No, only the design drawings will be provided.</p> <p>Q7 - Will an updated set of drawings be made available before award of contract? A7 - Should specification or drawing changes be finalized prior to award of a contract, the changes would be incorporated via an amendment to the RFP. Otherwise, changes would be incorporated after award via a contract modification in accordance with clause 52.212-4 and any addendum thereto.</p> <p>Q8 - How will Engineering Change Orders (ECOs) be handled? A8 - Contract changes would be incorporated via a contract modification in accordance with clause 52.212-4 and any addendum thereto.</p> <p>Q9 - In section 01010 - the Summary of Work - Part 3 Execution - subparagraph 3.6.2 Unloading phase on page 14 of the Chemical Steam Generator Assembly Package Specification No. 200GT-GM01 Revision No. 0 reference to a subparagraph 3.7.1 is made. Do the statements of subparagraph 3.6.2 actually reference subparagraph 3.6.1 or is there additional information we do not have access to? A9 - This is a typographical error. The reference should read 3.6.1 instead of 3.7.1.</p> <p>Q10 - What is the anticipated date of award announcement? A10 - The award announcement will be made as soon</p> <p>Continued ...</p>

	<p>as the award determination and all required coordination and approvals have been completed.</p> <p>Q11 - Is the anticipated start of the period of performance prior to the start of January?</p> <p>A11 - Proposals are currently due on November 20, 2007. The length of time it will take to review proposals, make an award determination, and complete internal review etc. (see A10), will depend on the number of proposals received, the degree of discussions required ; if any, personnel availability, etc. Therefore, we are unable to provide a firm date for the start of performance at this time.</p> <p>Q12 - On the schedule of supplies/services the initial award is for a minimum of 3 and a maximum of 33 with only a single unit price for all units. Is there any provisions or desire for differential pricing (i.e. 3 for \$X, 10 for \$Y, 33 for \$Z)?</p> <p>A12 - Proposal submission must comply with the RFP as stated, although additional alternate proposals may be submitted and will be reviewed.</p> <p>Q13 - We have decided that 3 of the 5 components are not suited for our shop. However we would be interested in quoting the ...other two components. Would this be acceptable?...</p> <p>A13 - At this time, we are looking for an all or nothing proposal. We recognize that not all firms can fulfill all of the tasks required, but any contract resulting from this RFP will be for delivery of final assemblies. Therefore, the RFP allows for teaming arrangements or subcontracting within the limitations specified therein.</p> <p>B. The date for receipt of proposals is NOT extended.</p> <p>C. As stated in block 14 of the SF30, all other terms and conditions are unchanged.</p>
